## Nasal-Aire® II Critical Care

Cannulas available in 6 different sizes. Each size is designed to be 9% larger than the previous size. (Note: The MP size fills an 18% sizing gap between the MD and LG)

**We made the change and removed the discomforts commonly associated with traditional masks. —Amanda**

The Nasal-Aire® II Critical Care is a lightweight nasal cannula style interface for noninvasive ventilation and PAP therapy. A proprietary internal seal eliminates the need for bulky, restrictive headgear.

- No typical mask discomforts: No nasal bridge sores, air leaks near the eyes or claustrophobic feelings
- Patients can easily eat, drink and wear glasses
- Virtually eliminates pressure points on the face and nose
- Patented L-Flow® technology delivers flow to patient with less turbulence
- Soft Silicone cannula features patented sealing within the nose
- Petite sized product line available
